

## Antivirus software the second most important piece of software on your computer.

### ANTIVIRUS SOFTWARE

We only recommend one antivirus program at companies at the moment.

F-Secure - we use this ourselves.

However we are always experimenting with other software providers so keep coming back and we will let you know our findings. Why is antivirus software the second most important software?

If your system is not up to date you will still be vulnerable to virus attacks, as the most important part of keeping your PC safe is still the general system security.
